

EARTH DAY IN OUR JUNIOR HIGH SCHOOL.

You can make a difference! We tried to find solutions to the pollution problem at local level. In April we decided to celebrate this event by planting some trees in the school area. Before we did it we did some research about pollution and how important are trees in our daily life. Sometimes we forgot about it and our action promoted planting trees for all school community. We were involved from the early beginning in planning space, choosing trees and bushes and learning about taking care.

During our project we also started a paper collection and we made „paper boxes” for the students at school to put used paper in. We decided to sell collected paper and give the money for charity. For now we saved one horse.

We are very proud that our action make a difference and we can see results. Trees are growing and one life is saved.
